Dosud neevidovaný tříkrejcar Ferdinanda III. z vratislavské mincovny

Pavel VOJTÍŠEK

Unregistered three-kreuzer piece struck under Ferdinand III in the Breslau mint The three-kreuzer piece from the Breslau mint produced by the mint-master George Hübmer (the MKČ type no. 1295a) in 1655 has not been registered yet in the numismatic literature. The coin proves the fact, that the marginal legends with the title "Duke of Silesia" were not extraordinarily used on coins struck in 1656 only, but also on coins produced one year earlier in 1655. Reason for existence of all these "undescribed" Baroque small and medium denominations in Breslau is undoubtedly represented by great variability of obverse and reverse marginal legends, plus large quantity of dies with different image varieties. This characteristic corresponds with extensive production of these denominations in the Breslau mint.

O→ three-kreuzer; Ferdinand III (1637–1657); Silesia; Breslau; 1655.

3krejcar; Ferdinand III. (1637–1657); Slezsko; Vratislav; 1655.
