Orientální mince a skleněné žetony z Micherovy sbírky (Addenda I)

Vlastimil NOVÁK

Oriental coins and glass jetons from the Michera collection (Addenda I) In 2006, a catalogue of more than two hundred glass weights, vessel stamps and jetons representing the most interesting part of the Josef Michera collection was published (Novák 2006). Because of its typology, number and historical proportionality, it is a collection of the European importance. Few years ago, intensive revision activities took place in the numismatic department of the National Museum in Prague. Some individual pieces with preserved concordance to the Michera collection have been found. Eleven Oriental coins and one glass jeton can help us reveal how broad historically and geographically was the scope of the Michera numismatic collection, now unfortunately preserved in its incompleteness.
