### Abstract

In course of the tunneling of the new railway tunnels (so-called *Nové spojení*) below the Vítkov Hill in Prague was found the old and unknown mining working - adit about total length ca 120 metres. This adit is by technical remainder probably of the prospecting activities of raw materials in the Prague area in the past.

**Key words:** *historical adit, railway tunnels, the Vítkov Hill, Ordovician, the Prague Basin, central Bohemia*
