Additional unpublished variety of the oldest type of the white coin struck under Ferdinand I Hapsburg

A new variety of the white coin struck under Ferdinand I is presented in the article. It is specific with its dividing marks in form of two five-foils placed at the beginning and in the middle of the marginal legend. These symbols, together with image form of lion and form of ornamental 'D' letter, are identical with those ones on the white coins of the Ferdinand's predecessor – Louis Jagiellon. That is why this piece was classified as the oldest type of the white coin struck under Ferdinand I.

 *white coins; new variety; Ferdinand I (1526–1564); Kuttentberg [CZ].*
