Continuation in copying of the reverses of the hop tokens?

Three varieties of the hop tokens from the estate of Tuchořice (Žatec/Saatz region) represent copying of the reverse dies in the Saatz production place owned by Rudolf Lässig. Only the variety 18b – registered in the case of other hop tokens in villages around Saatz – comes from Saatz itself. The older variety 18a served as the prototype, connected via its obverse with the tokens of the Domaine Tuchschoritz series in denominations of 1/2 L and 1 L. The beverage jetons with identical reverse have been registered in places relatively distant from Saatz. Their Saatz origin is not probable then.

🔑 *hop tokens; copying; striking place; Rudolf Lässig; Tuchořice; Žatec [Saatz].*
